GRUPPO FERROLI: THE FERROLI GROUP

Ferroli, the European multi-national giant of domestic and industrial heating, air-conditioning and water heating, was founded in 1955 by Dante Ferroli in San Bonifacio, near Verona, in Italy. Today, nearly six decades later, Ferroli has 30 plants and business organisations, 6 R&D centres and operates in over a 100 countries worldwide. Despite our size and scale, we remain a family business at heart with a strong commitment to design innovation, build quality and carbon reduction.

Ferroli has brought many innovative domestic and industrial heating and cooling appliances and high efficiency renewable products into the marketplace (Visit www.ferroli.it).

We market products under a number of brand names, in addition to Ferroli. One of these is the prestigious Lamborghini brand. Lamborghini products have been styled by one of Italy's top design studios and meet the highest European standards of manufacture.

The Ferroli group prides itself on its self-sufficiency. From the initial concept through to design, manufacturing and marketing, Ferroli's products are produced entirely in-house. Most components are also produced by Ferroli, with only a very small percentage sourced from elsewhere. This allows for complete control over the quality, delivery and the all-important after-sales service of all Ferroli's products.

Mr. Dante Ferroli - Founder of Ferroli

Ferroli products incorporate technical expertise, energy efficiency, sturdiness and safety, which satisfy the most demanding consumers around the world.

The Ferroli group is committed to investing in India, in order to cater to the smarter and more discerning consumer, who is looking for a water heater that combines style with high performance and energy efficiency.

our ideology

live.smart

At Ferroli, we are committed to supporting your smart, contemporary lifestyle.

With every technological breakthrough, human capabilities and potential get further enhanced. Today, technology has become physically smaller and more mobile. It is interactive and intuitively integrated into our lives. The idea that technology is becoming an extension of us is now more of a reality. Recognising this, at Ferroli, we make sure that our products are technologically advanced, stylishly designed and energy efficient.

You will soon discover our ultra-performing Blue Forever patented heating technology that gives your water heater a longer life and lowers your maintenance costs. You will also experience the energy efficiency of your Ferroli water heater, which will save power and help protect the environment.

Some of our models are Wi-Fi enabled, so you can use your smart phone to programme the time, temperature, quantum of water and other usage parameters of your water heater when connected to your in-house Wi-Fi network.

Enjoy the Ferroli live.smart experience!

our unique features

PATENTED

**Blue
Forever** 
Classlined heating element

'Blue forever' is a new generation of ultra-strong heating elements, created at the Ferroli global R&D centre in San Bonifacio. This patented technology is designed to reduce scaling, increase heating efficiency and prolong the life of the heating element significantly. 'Blue Forever' is at the heart of all Ferroli electric water heaters available in India.

Most other electric water heaters are made with copper heating elements that attract calciferous deposits (See picture on the facing page).

In Ferroli water heaters, the heating element is enamelled with blue silicon, which is a unique patented process.

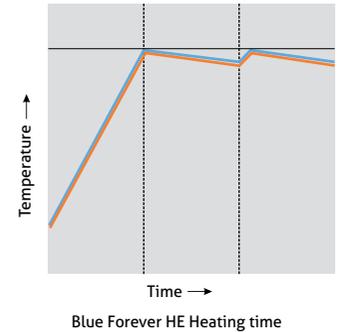

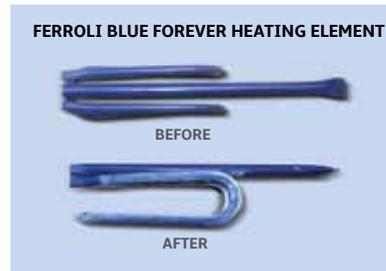

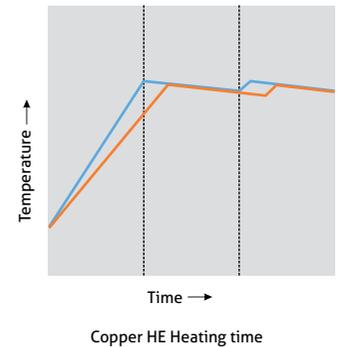

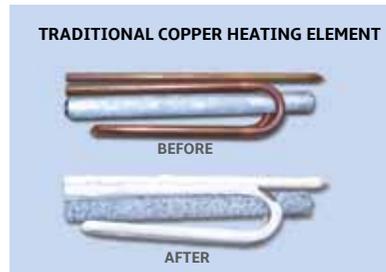

The Ferroli 'Blue Forever' technology eliminates all deposits on the heating element and keeps your water heater scale-free, safe and looking good.

Its high heating efficiency lasts throughout the life of the product and guarantees better heating and energy saving.

Advantages of Blue Forever:

- **Reduces limestone deposits significantly, thus lengthening the lifespan of the heating element.**
- **Maximum efficiency of the element for a longer period.**
- **Maintains high performance characteristics throughout the life-span of the element**

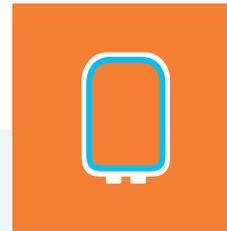

— Heating pattern before scaling
— Heating pattern after scaling

our unique features

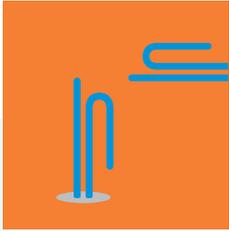

10% MORE ENERGY EFFICIENT THAN A BEE 5★ RATED PRODUCT

Ferroli water heaters have high quality injected PUF insulation which conserves heat longer, resulting in significant savings in energy costs. As a result, most models of Ferroli have 10% higher efficiency compared to the 5 star, (the highest) rating standard of the Bureau of Energy Efficiency or BEE. This means that using a Ferroli water heater will lower your electricity bills.

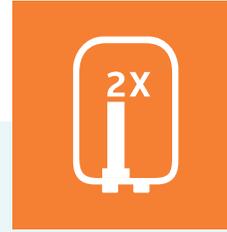

HEALTHY BLUE SILICON ENAMEL COATED TANK

All Ferroli, electric water heater tanks undergo a special, corrosion-proof treatment called the Blue Silicon enamel powder coating process. This treatment uses a hi-tech, electro-static application technique. The subsequent baking in the furnace at 870° C, creates a perfect glass lining on the tank, ensuring a longer life. It also creates an ultra-hygienic surface inside the tank, thereby retaining purity of the water.

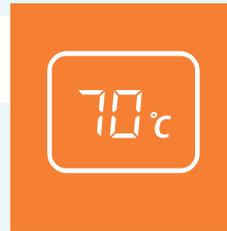

QUICK HEATING SYSTEM

Some Ferroli water heaters have two heating elements, one for normal operations and another for quick heating. Quick heating delivers hot water in a much shorter time. You can choose between the normal and quick heating options through a simple switch.

LONG LASTING ALUMINIUM ANODE

All Ferroli water heaters have an aluminium anode which protects the glass lining of the tank and the heating element giving your water heater a longer life. In fact, the aluminium anode lasts twice as long as the conventional magnesium anode, being used by other water heaters in the market.

DIGITAL TEMPERATURE DISPLAY

Ferroli storage water heaters are equipped with a digital temperature display that allows you to see the temperature of the hot water inside the tank. This ensures that your bath water is set to the right temperature to enhance your bathing comfort.

product range

MITO 1, 3, 6 | CALDO 10, 15, 25 (H&V) | CALDO WiFi 20

CALDO 50, 70, 100 (H&V) | HE 150, 200, 300, 400, 500

Mito

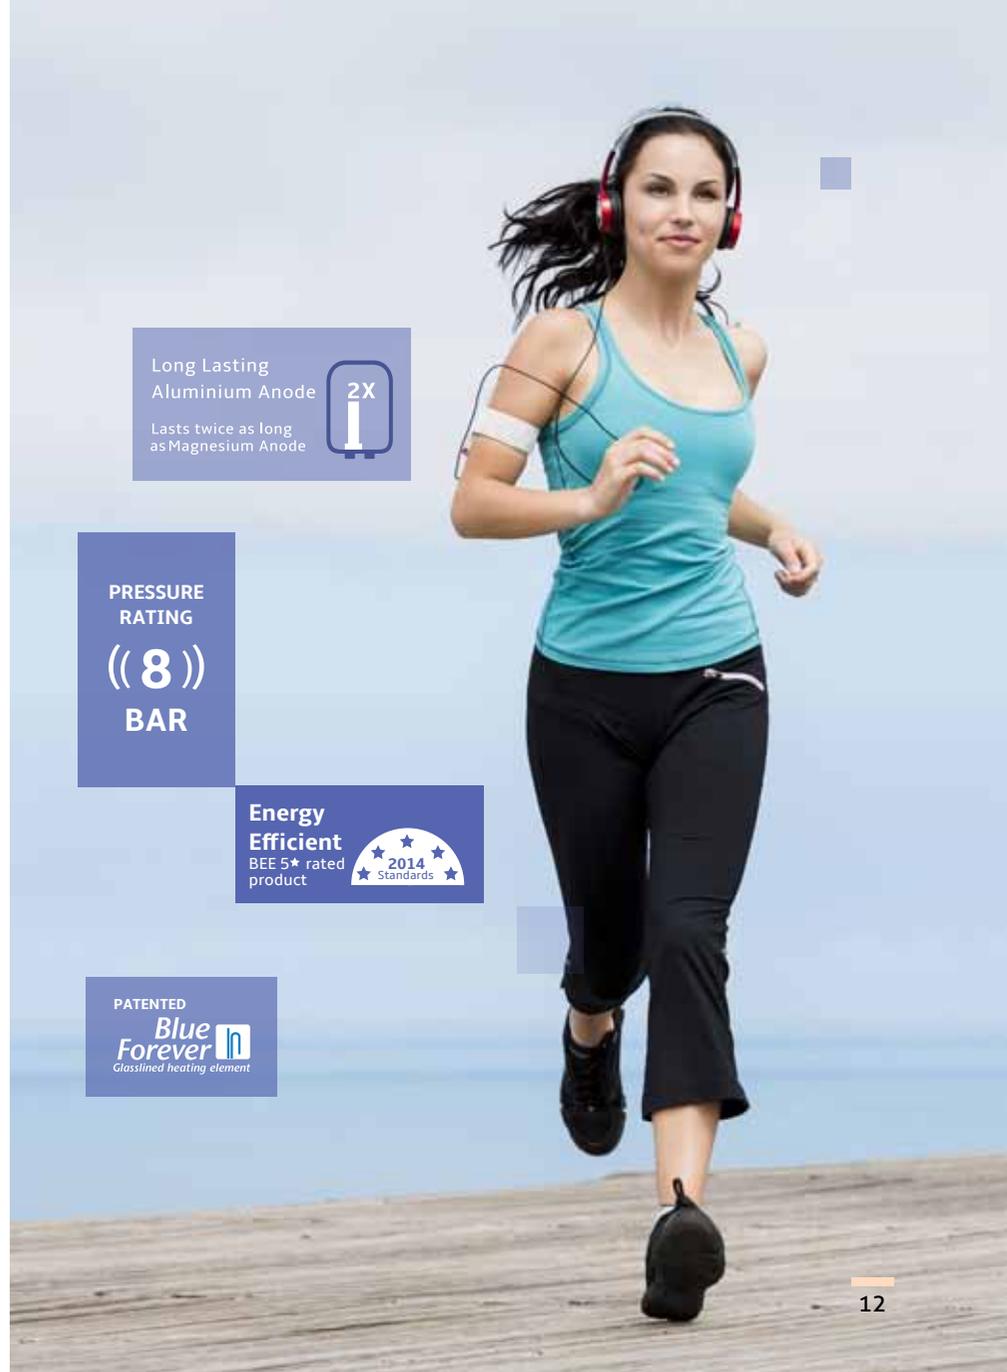

ELECTRIC WATER HEATERS

Now, the Indian consumer will be able to use an instant water heater with the patented 'Blue Forever' heating element and an aluminium anode, in the Mito range of water heaters from Ferroli.

Mito water heaters are available in 1, 3 and 6 litre capacities. Choose the one that is most suitable to your needs.

The 1 and 3 litre Mito water heaters have a pressure rating of 8 bar (80 mtrs water head). This is significantly higher than competing products which have a pressure rating of only 6.5 bar. This enables Mito water heaters to withstand higher pressure making them more suitable for use in high rise buildings and for pressure pump applications.

Mito water heaters are stylish and add a touch of class to your smart, modern lifestyle.

Caldo

ELECTRIC WATER HEATERS

All Caldo water heaters incorporate Ferrolì's patented 'Blue Forever' heating element designed to reduce scaling, increase heating efficiency and prolong the life of the water heater. They also come with the Aluminium Anode which lasts twice as long as the conventional magnesium anode used in other water heaters and also protects the glass lining of the tank.

The energy efficiency of Caldo water heaters is 10% higher than the standard defined for the BEE 5 star rating for water heaters.

Caldo water heaters bear the Ferrolì hallmark of style. You will find that their elegant design fits right in with your contemporary lifestyle.
