MCBs and Distribution Boards

INDOASIAN ™
MAKES SENSE

Complete Solutions

IndoAsian with its Indian origin and strong presence has garnered longstanding trust amongst its consumers over the past 56 years. IndoAsian's high quality products and their unmatched value are a result of Frugal Engineering that caters especially to the Indian market.

Today we present to you, the complete Optipro range – the reliable choice in protection and distribution devices. Optipro's flexible range includes the best quality MCBs and Distribution Boards that are priced just right, and it is all that you need. Coming from the company that has expertise in catering to this product segment, it makes sense to choose Optipro for your dream project.

The Range

Optipro is the result of a clear understanding of consumer needs.

The extensive range, which includes MCBs, Isolators, RCDs, Distribution Boards and Accessories, takes care of all your project requirements. They are designed to provide complete protection against short-circuits, overloads and residual current faults, and come with a wide range of phase selectors, enclosures, and plug and socket types, thus making Optipro a safe and reliable choice for your projects.

The Quality

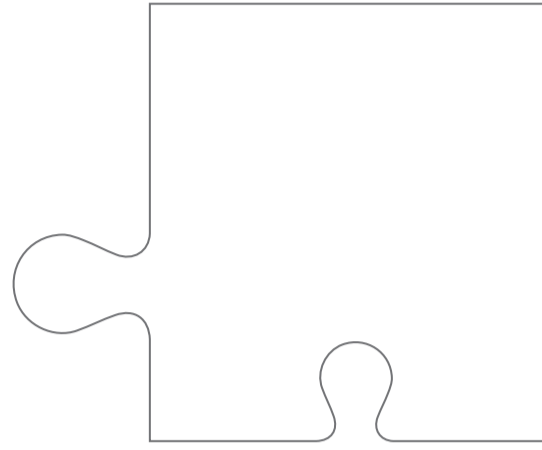

Optipro is developed through an engineering process that reduces complexity in production but, at the same time, promises uncompromising quality. The homogeneity of these products is evident in their firm finishes. The technical identifications on the products withstand the test of time, thanks to high quality pad printing. The carefully selected components that make up the Optipro range are resistant to extreme weather conditions and thus ensure durability and great performance.

The Right Deal

IndoAsian has stayed true to its brand promise of true value. Optipro doesn't just promise a comprehensive range of great quality, but offers it at the right deal, making it 'All That You Need'.

MCBs

Optipro's range of MCBs demonstrates proven endurance against overloads and short circuits with its high current-carrying capacity. Engineered to support easy installation, each MCB is designed keeping in mind the highest safety and compliance parameters. This means zero exposure to live parts, and a user-friendly, efficient interface that makes Optipro the only safe and reliable choice.

Features

Complete Range

The complete Optipro range includes MCBs, Isolators, RCDs, and Accessories.

Exceptional Endurance

The products have high electrical and mechanical endurance, with ambient temperatures of -25°C to $+70^{\circ}\text{C}$.

Breaking Capacity

The devices in the range have a breaking capacity of 10kA.

Line Load Reversibility

The design enables line load reversibility in MCBs which means that you can connect the load from either side (top or bottom) of the MCB.

Contact Indication Window

The devices are designed as per user friendliness.

The visual indications help users identify the position of the MCB.

- Red = ON • Green = OFF

Large Terminal

The 35 sq mm terminal is designed to incorporate wires of bigger sizes. It ensures safety by making sure that the loose ends of the wires are tightly held and don't hang around.

Protection IP 20

We realise the importance of safety, and have designed the range in such a way that no live parts are exposed to human contact, thus making the devices safe to use.

Dual Position Clamp

The dual position clamp helps in easy mounting and unmounting of the MCB.

Superior Design

Optipro's homogenous design is aesthetically superior and built in with features like the ergonomically designed knob for better grip and good quality pad printing.

Air Flow Channel

The special air flow channel on the MCBs allows the air to come out. This, in turn, helps in maintaining the temperature inside and thereby increases its durability.

Bi-Connect Terminal

The bi-connect terminal provides flexibility by allowing the lines to be connected through both wires and bus bars.

Distribution Boards

Optipro's range of Distribution Boards offers complete solutions with unmatched quality and value. Easy to install and operate, the resourceful design complies with the True IP43 protection standard. The range has fresh and innovative designs that will match with any wall texture.

Wide Range

The Optipro range is a complete and thought-through range of Distribution Boards with SPN, TPN, VTPN, Flexi, 7 segment, phase selectors, enclosures and plug & socket types. This range single-handedly answers all your project needs.

Total Safety

True IP43 in its segment

Degree of protection in double door DBs is IP43.
The design is tested as per IEC 60529 for the IP test.
The True IP43 design makes the range suitable for all situations that demand IP43 degree of protection.

Cement protector

A specially-designed cement protector does not allow cement, dust, etc., to enter the DB during construction. Once construction is complete, the cement protector can be easily removed for wiring, keeping your DB free from dust and damage.

Isolated neutral bar

Once installed, the neutral bar on the Optipro Distribution Board is completely isolated from the box. It is neither visible nor is it accessible to human touch, offering complete protection against the live parts.

Simple Look

Fresh design

Thanks to its sleek and minimal look, the Optipro Distribution Board looks great on any wall. Its fresh and innovative design has truly transformed Distribution Boards for the future.

Innovative door knob

The knob of the Distribution Board is unique in design to meet all operational needs. The knob is sleek with less projection off the surface. The innovative sliding mechanism grants it a longer life.

New colour & finish

Optipro Distribution Boards come in a new exciting colour that goes well with any decor. The matte finish of the product makes it match well with any wall texture. The finish does not attract dust and keeps the exterior clean.

Plain corners

The Optipro range is engineered to have no sharp edges. Thus, your hand will simply glide over smooth and plain corners when you interact with the product, giving you a safe and stylish Distribution Board.

Ease of Use

Independent shield

The Optipro Distribution Board has an independent shield that is removable when necessary. During maintenance, the shield can be removed, while the door and frame remain in place. This makes operation fast and easy.

Box separately packed

Optipro presents the concept of twin packaging. Parts like the frame, shield and door are packed separately from the box. Thanks to this insight, installation is made easier for the user. The frame, shield and door can be safely stored until complete wiring and painting is done.
